

MACHINE CAPACITY INFORMATION

We specialise in machining components of all sizes, from small to large. Whether it's a single unit or a large volume project, our priority is flexibility and top-quality results.

With our skilled engineers and a well-equipped 1,310m² workshop, we offer a comprehensive range of services, including Horizontal and Vertical Boring, Turning, Milling, and more.

Our facilities feature a temperature controlled inspection area and a Faro Arm for digital inspection, ensuring precision and efficiency in all projects.
